ELECTRIC

Speed Road Wagon

THE above illustrates our new 1904 light Speed Runabout. Our aim has been to so design and equip it that it will travel more rapidly than the regulation electric carriage. The forward box design is distinctive and contains a compartment suitable for carrying the storm apron, side curtains and small packages. It is fitted with 30 cells of No. 28 Sperry or 30 cells of 7 PV Exide batteries. This gives a light battery equipment. 24 cells of heavier battery, No. 29 Sperry or PV-9 Exide at the same price will give larger mileage but less speed.
